

Annual Subject Index

2,3-diaminophenazine Quantitative estimation of Pyrophosphate ions released during loop-mediated isothermal amplification	1101	Acetylcholinesterase Ajmaline-acetylcholinesterase interaction: Insights from Docking, Molecular dynamics, and Predictive machine learning models	990
2-bromo-5-methylpyridine Computational, Spectroscopic, Hirshfeld surface, Molecular docking and Topological studies on 2-bromo-5-methylpyridine as potent anti-cancer agent	683	Acidogenesis <i>Aspergillus niger</i> acidogenic metabolism: A biased view from the C and N interface	321
3D-Culture Advances in myogenic differentiation: Role of stem cells, RNA-binding proteins, Molecular pathways, and Detection techniques	301	Actinonin Virtual screening of rice phytochemical scaffolds targeting peptide deformylase of <i>Xanthomonas Oryzae</i> pv. <i>Oryzae</i> for the control of bacterial leaf blight	1220
4B2ES Quantum chemical analysis and anticancer evaluation of 1,4-benzenedicarboxylic acid bis(2-Ethylhexyl) ester: Topological indices, reduced density gradient, molecular electrostatic potential, natural bond orbital	1325	Activation energy Exploring MHD convective based SWCNT-MWCNT-GO ternary hybrid nanofluids with variable viscosity and exothermic reactions	766
4-chloro-6,7-dimethoxyquinazoline Spectroscopic study, Quantum Chemical Investigations, <i>In silico</i> and Drug Likeness of 4-Chloro-6,7-dimethoxyquinazoline: A potent study of new anti-alzheimer agent	406	<i>Adenomatous polyposis coli</i> Computational analysis of <i>N2</i> -Aryl-1,2,3-triazoles as potential multi-target inhibitors	1129
4-Hydroxyphenylpyruvate dioxygenase Aryloxyacetic acid derivatives as inhibitors of the HPPD enzyme: A quantitative structure-activity relationship analysis	882	ADME Identification of novel compound against STAT3 mediated liver fibrosis: An MD simulation based study	178
5f-203 Exploring benzothiazole derivatives: Promising PLK1 Inhibitors for cancer therapy through Virtual screening, Molecular docking, and ADMET evaluation	584	ADMET properties Spectroscopic study, Quantum Chemical Investigations, <i>In silico</i> and Drug Likeness of 4-Chloro-6,7-dimethoxyquinazoline: A potent study of new anti-alzheimer agent	406
5-hydroxytryptamine (serotonin) subtype 3 receptor Antagonists binding at 5-HT ₃ R _{AA} , 5-HT ₃ R _{AB} and 5-HT ₃ R _{AC} can potentially counteract nicotine binding	919	ADMET Computational, Spectroscopic, Hirshfeld surface, Molecular docking and Topological studies on 2-bromo-5-methylpyridine as potent anti-cancer agent <i>In silico</i> exploration of selected coumarin derivatives as potential antioxidant: Insights from DFT, NBO, Hirshfeld surface, ADMET profiling, Molecular docking and Dynamics simulations	683
6-gingerol Antagonists binding at 5-HT ₃ R _{AA} , 5-HT ₃ R _{AB} and 5-HT ₃ R _{AC} can potentially counteract nicotine binding	919	Green synthesis, structural characterization, DFT, molecular docking and biological evaluation of some novel anti-cancer compounds Bioinformatic analysis of cervical cancer-associated hub genes and repurposing of 5-fluorouracil and gemcitabine as potential therapeutic agents	827
6-shogaol Antagonists binding at 5-HT ₃ R _{AA} , 5-HT ₃ R _{AB} and 5-HT ₃ R _{AC} can potentially counteract nicotine binding	919	Adsorption Exploring benzothiazole derivatives: Promising PLK1 Inhibitors for cancer therapy through Virtual screening, Molecular docking, and ADMET evaluation	861
8-OHdG Unveiling the mitigating effect of matcha-silver nanoparticles on radiation-induced ovarian injury in rats	724	Ajmaline Ajmaline-acetylcholinesterase interaction: Insights from Docking, Molecular dynamics, and Predictive machine learning models	584
Abiotic stress <i>In silico</i> based profiling and characterization of functional microRNAs and their crucial targets in <i>Saccharum officinarum</i>	154		990

Alkaline phosphatase		Anti-cancer agents	
Evaluation of osteogenic activity of Plaksha (<i>Ficus lacor</i> Buch. Ham.) stem bark on human dental pulp derived mesenchymal stem cells	131	<i>In silico</i> molecular docking and virtual screening of natural compounds against Tubulin-7-Aminonoscipine complex (6Y6D) for estimation of anticancer potential	117
Alpha lipoic acid		Exploring benzothiazole derivatives: Promising PLK1 Inhibitors for cancer therapy through Virtual screening, Molecular docking, and ADMET evaluation	584
The effects of lipoic acid on rat submandibular salivary gland in valproic acid induced oxidative stress	576	Integrating network pharmacology and molecular docking to assess <i>Catharanthus roseus</i> as a natural alternative for leukemia therapy	1211
Alternative therapy		Extraction, purification, and bioevaluation of phycoerythrin from <i>Halymenia refugium</i> against pathogenic bacteria and A549 lung cancer cell line	1277
Integrating network pharmacology and molecular docking to assess <i>Catharanthus roseus</i> as a natural alternative for leukemia therapy	1211		
Alzheimer's disease		Anti-diabetic drugs	
Spectroscopic study, Quantum Chemical Investigations, <i>In silico</i> and Drug Likeness of 4-Chloro-6,7-dimethoxyquinazoline: A potent study of new anti-alzheimer agent	406	A review on repurposing anti-diabetic drugs for the amelioration of betel-nut induced carcinogenesis	222
Virtual screening study to identify GSK-3 β inhibitors: A combined ligand-based and structure-based drug discovery approach	978	Anti-diabetic	
Ajmaline-acetylcholinesterase interaction: Insights from Docking, Molecular dynamics, and Predictive machine learning models	990	Exploring the potential of <i>Laurus nobilis</i> as activators of insulin receptor activity	431
Anaemia		Antifungal action	
Structural elucidation and evaluation of antioxidant and <i>In vitro</i> anti-hemolytic properties of polysaccharide-iron complexes from <i>Piper betel</i> and <i>Triticum aestivum</i>	88	Carbon nanotubes a promising new generation drug: A detailed journey in biochemical and biomedical fields	1157
Angiogenic factor		Antifungal activity	
Insight into the etiology of preeclampsia	449	Eco-friendly plant based disease control: Exploring <i>Terminalia</i> species extracts as bio-pesticide against fungal pathogen	1410
Angiotensin II		Anti-fungal	
CircHelz inhibition protects against angiotensin II-induced cardiac fibrosis <i>via</i> miR-29b modulation	7	Structure-based inhibition of <i>Rhizoctonia solani</i> in rice sheath blight Beta-glucosidase by natural terpenoids	1351
Antibacterial activity		Anti-inflammatory activity	
Study of antibacterial and photocatalytic potential of phytomedically synthesized ZnO nanoparticles from <i>Prunus domestica</i> L.	1417	Marine natural products as novel therapeutic approaches in Psoriasis: A comprehensive review	1056
Antibacterial		Antimicrobial activity	
Self-assembly of novel ureido dipeptide esters and investigation of its gelation property	909	Carbon nanotubes a promising new generation drug: A detailed journey in biochemical and biomedical fields	1157
Green synthesized copper oxide nanoparticles from <i>Ocimum tenuiflorum</i> fabricated in PVC for antibacterial, antioxidant, and anticancer biomedical applications	1092	Antimicrobial peptides	
Extraction, purification, and bioevaluation of phycoerythrin from <i>Halymenia refugium</i> against pathogenic bacteria and A549 lung cancer cell line	1277	Investigations on novel aedesin-derived peptides against ESKAPE pathogens	1142
Antibiotic resistance		Antimicrobial screening	
Phenotypic antibiotic resistance: Involvement of genes and additional factors	281	Synthesis, characterization and anticancer activity of novel schiff base ligand and its metal complexes	929
Antibody diagnostics		Antioxidant parameters	
Development of a sensitive and affordable alternative ELISA method for detection of human IgG antibodies	1007	The effects of lipoic acid on rat submandibular salivary gland in valproic acid induced oxidative stress	576
		Antioxidant	
		Structural elucidation and evaluation of antioxidant and <i>In vitro</i> anti-hemolytic properties of polysaccharide-iron complexes from <i>Piper betel</i> and <i>Triticum aestivum</i>	88

Unveiling the mitigating effect of matcha-silver nanoparticles on radiation-induced ovarian injury in rats	724	Asprosin	
Marine natural products as novel therapeutic approaches in Psoriasis: A comprehensive review	1056	Tracing the evolutionary history of novel hormone asprosin: An <i>in silico</i> study across vertebrates	700
Green synthesized copper oxide nanoparticles from <i>Ocimum tenuiflorum</i> fabricated in PVC for antibacterial, antioxidant, and anticancer biomedical applications	1092	Autodock vina	
Extraction, purification, and bioevaluation of phycoerythrin from <i>Halymenia refugium</i> against pathogenic bacteria and A549 lung cancer cell line	1277	<i>In silico</i> molecular docking and virtual screening of natural compounds against Tubulin-7-Aminonoscaine complex (6Y6D) for estimation of anticancer potential	117
Phyto-fabrication and characterization of silver nanoparticles from <i>Trachyspermum ammi</i> (Ajwain) seeds and assessment of their antifungal activity	1429	Autoimmune disorders	
Antitumor agents		Marine natural products as novel therapeutic approaches in Psoriasis: A comprehensive review	1056
Virtual screening and molecular dynamic simulation to identify the potent SOX2-inhibiting drugs	596	Autoimmune neuropathy	
Antiviral compounds		Immune system involvement and neuropathology in Guillain-barré syndrome: Approaches to therapy	1315
Computational screening of FDA-approved and natural compounds against Mpox Dual specificity protein phosphatase (H1)	398	Autoimmune response	
Apoptosis β -Caryophyllene		Immune system involvement and neuropathology in Guillain-barré syndrome: Approaches to therapy	1315
Beta-caryophyllene ameliorates environmental toxicants-induced experimental nephrotoxicity through regulation of redox system and inflammation	138	Autophagy	
Apoptosis		<i>Aspergillus niger</i> acidogenic metabolism: A biased view from the C and N interface	321
Overexpression of <i>DDx49</i> promotes cell proliferation and associated with poor prognosis in liver cancer: <i>In silico</i> analysis	147	Azomethine	
Potential effects of hesperidin isolated from <i>Zanthoxylum rhetsa</i> against NTERA-2 cancer stem cells	502	Synthesis, characterization and anticancer activity of novel schiff base ligand and its metal complexes	929
The phytochemicals present in <i>Vitex negundo</i> leaf extract transcriptionally regulates colorectal cancer: An <i>In vitro</i> study using HCT-116 cells	1015	Bacterial disruption	
Aromatic herb		Insights into anti-tuberculosis activity of partially purified bioactive fraction from <i>Vitex negundo</i> L. petroleum ether extracts against <i>Mycobacterium smegmatis</i> -An <i>in vitro</i> and <i>in silico</i> approach	1077
Heterocyclic organic compounds extracted from <i>Artemisia judaica</i> (L.) induced caspase-dependent mitochondrial pathway in different breast and liver cancer cell lines: <i>In silico</i> and <i>in vitro</i> studies	1233	Bacteroids	
Artificial intelligence		Exploring the role of plant associating bacteria as bioinoculants and their beneficial effects in phytostimulation: A review	567
Mathematical modelling of time series data for tuberculosis notified cases in India using neural networks models: CNN, NNAR, and ANFIS models integrated with wavelets	1118	Basil sprouts	
Aryloxyacetic acid derivatives		Standardization of germination conditions for nutritional enhancement of underutilized basil seeds	391
Aryloxyacetic acid derivatives as inhibitors of the HPPD enzyme: A quantitative structure-activity relationship analysis	882	Benign prostate hyperplasia	
<i>Ashwagandha</i>		The influence of quantitative alterations of steroid hormones on energy metabolism of prostate tumors	349
Pharmacoinformatic based screening of phytochemicals from <i>Ashwagandha</i> (<i>Withania somnifera</i>) against serine/arginine splicing factor 1 protein in treatment of pancreatic cancer	632	Benzene	
<i>Aspergillus niger</i>		Exploring the therapeutic potential of Zonisamide derivatives through molecular docking and dynamic studies with GABARAP	786
<i>Aspergillus niger</i> acidogenic metabolism: A biased view from the C and N interface	321	Benzothiazole	
		Exploring benzothiazole derivatives: Promising PLK1 Inhibitors for cancer therapy through Virtual screening, Molecular docking, and ADMET evaluation	584
		Betel-nut	
		A review on repurposing anti-diabetic drugs for the amelioration of betel-nut induced carcinogenesis	222
		BGM	
		Morpho-molecular screening of chickpea (<i>Cicer arietinum</i> L.) genotypes for resistance to <i>Botrytis</i> grey mould disease	381

Binding affinity		Bio-pesticides	
Neural network based prediction of site-specific stable mutants in wild type CFTR protein	511	Virtual screening of rice phytochemical scaffolds targeting peptide deformylase of <i>Xanthomonas Oryzae</i> pv. <i>Oryzae</i> for the control of bacterial leaf blight	1220
Binding pocket		Eco-friendly plant based disease control: Exploring <i>Terminalia</i> species extracts as bio-pesticide against fungal pathogen	1410
Understanding the conformational dynamics of an intrinsically disordered protein bound to a small molecule	712		
Bioaccumulation		Biosensor	
Size-driven fluorescent properties in Nanophotonics	1290	Advanced photonic crystal fiber-based surface plasmon resonance biosensors for transformative RI sensing	54
Bioactive-compound		Bio-stimulant	
Antimicrobial and antibiofilm potential of <i>Morus macroura</i> against <i>Streptococcus pneumoniae</i>	665	Exploring the role of plant associating bacteria as bioinoculants and their beneficial effects in phytostimulation: A review	567
Bioactivity		Biosurfactants	
Exploring the potential of <i>Laurus nobilis</i> as activators of insulin receptor activity	431	Characterization of dry Graphite MWCNT hybrid ECG electrodes and the role of biocompatible surfactants fabrication additive on the bio-signal responses	645
Biochemical potential		Biosynthesis	
Carbon nanotubes a promising new generation drug: A detailed journey in biochemical and biomedical fields	1157	Green synthesized copper oxide nanoparticles from <i>Ocimum tenuiflorum</i> fabricated in PVC for antibacterial, antioxidant, and anticancer biomedical applications	1092
Biocontrol agents		Biotin-streptavidin chemistry	
Structure-based inhibition of <i>Rhizoctonia solani</i> in rice sheath blight Beta-glucosidase by natural terpenoids	1351	Development of a sensitive and affordable alternative ELISA method for detection of human IgG antibodies	1007
Biofilms		Blood, Diagnosis	
Antimicrobial and antibiofilm potential of <i>Morus macroura</i> against <i>Streptococcus pneumoniae</i>	665	Circulating myokines and apelin-13 levels as predictive biomarkers for newly diagnosed type 2 diabetes mellitus	798
Biohybrid molecules		Bone marrow mesenchymal stem cells (BMSCs)	
Biohybrid molecules: Integrating natural and synthetic components for advanced biochemical applications	107	BMSC-derived exosomes regulate the miR-133b/NLRP3 axis to protect against injury to the spinal cord	654
Bioinformatics analysis		<i>Botrytis</i> grey mould	
Identification of hub genes in monocyte macrophages of high and low peak bone mass populations and early diagnostic biomarkers for osteoporosis	743	Morpho-molecular screening of chickpea (<i>Cicer arietinum</i> L.) genotypes for resistance to <i>Botrytis</i> grey mould disease	381
Bioinformatics		Botulinum toxin type A	
Predictive analysis of structural interaction among HIV-1 proteins and Class I MHC molecule: A computational approach for therapeutic target	1198	Inhibition of Botulinum neurotoxin A protease activity by Quercetagenin	161
Biomarker		Breast cancer	
Overexpression of <i>DDx49</i> promotes cell proliferation and associated with poor prognosis in liver cancer: <i>In silico</i> analysis	147	Computational, Spectroscopic, Hirshfeld surface, Molecular docking and Topological studies on 2-bromo-5-methylpyridine as potent anti-cancer agent	683
Immune system involvement and neuropathology in Guillain-barré syndrome: Approaches to therapy	1315	Investigating the role of phytochemicals from <i>Euphorbia pulcherrima</i> and <i>Ricinus communis</i> in modulating estradiol 17-beta -dehydrogenase 1 activity for breast cancer treatment	733
Biomedical application		Broad spectrum disease resistance	
Green Synthesis of Nickel Oxide Nanoparticles using <i>Vitex negundo</i> Leaf for Antibacterial and Anti-inflammatory Activities	363	Virtual screening of rice phytochemical scaffolds targeting peptide deformylase of <i>Xanthomonas Oryzae</i> pv. <i>Oryzae</i> for the control of bacterial leaf blight	1220
Carbon nanotubes a promising new generation drug: A detailed journey in biochemical and biomedical fields	1157		
Bio-nanocomposite			
Synthesis and characterization of gold nanoparticle-mediated bamboo biochar nanocomposite-based electrode and analysis of its electrochemical behaviour	169		

BSLA		Caspase 3/8/9	
Zinc Oxide Nanorods from <i>Prunus domestica</i> L.: Bio-Assisted Synthesis, Characterization, Antioxidant and Cytotoxic Activities	78	Potential effects of hesperidin isolated from <i>Zanthoxylum rhetsa</i> against NTERA-2 cancer stem cells	502
Butyramide		Caspase-3	
The HMG-CoA reductase inhibitory potential of fatty acid amides	17	Heterocyclic organic compounds extracted from <i>Artemisia judaica</i> (L.) induced caspase-dependent mitochondrial pathway in different breast and liver cancer cell lines: <i>In silico</i> and <i>in vitro</i> studies	1233
CA VII		Catalase	
<i>In silico</i> exploration of selected coumarin derivatives as potential antioxidant: Insights from DFT, NBO, Hirshfeld surface, ADMET profiling, Molecular docking and Dynamics simulations	827	Lipid peroxidation level and histological changes in rat liver after the cisplatin and dexamethasone separate and combined action	480
<i>Calligonum polygonoides</i> extract		Cell cycle	
HMG-CoA Reductase inhibition targeted hypercholesterolemic potential of phytoconstituents of an aqueous shoot extract of <i>Calligonum polygonoides</i> L.: Insight from <i>in vitro</i> , <i>in vivo</i> and <i>in silico</i> assessments	935	Benzo (a)pyrene exposure reduces CD54 expression on alveolar macrophages and alters apoptosis and inflammatory responses in the lungs	607
cAMP		Cellulolytic system	
Phosphodiesterase 4 as a candidate therapeutic target of cancer	213	Localization of cellulolytic system and <i>de novo</i> transcriptome analysis of whole larval gut of <i>Zophobas morio</i> (Coleoptera: Tenebrionidae) disclosed the existence of glycosyl hydrolase family-9	69
Cancer progression		Cervical cancer	
Phosphodiesterase 4 as a candidate therapeutic target of cancer	213	Bioinformatic analysis of cervical cancer-associated hub genes and repurposing of 5-fluorouracil and gemcitabine as potential therapeutic agents	1258
Cancer		Characteristics	
A review on repurposing anti-diabetic drugs for the amelioration of betel-nut induced carcinogenesis	222	Synthesis, characterization and anticancer activity of novel schiff base ligand and its metal complexes	929
Virtual screening and molecular dynamic simulation to identify the potent SOX2-inhibiting drugs	596	Chemotaxis	
Carbon dots, Diagnosis		Exploring the role of plant associating bacteria as bioinoculants and their beneficial effects in phytostimulation: A review	567
Quantitative estimation of Pyrophosphate ions released during loop-mediated isothermal amplification	1101	Chickpea	
Carbon monoxide		Morpho-molecular screening of chickpea (<i>Cicer arietinum</i> L.) genotypes for resistance to <i>Botrytis</i> grey mould disease	381
Insight into the etiology of preeclampsia	449	Chlorsulfuron	
Carbon nanotube		Genomic and structural studies on S-Glutathione transferases to confer herbicide tolerance in rice through computational approach	533
Characterization of dry Graphite MWCNT hybrid ECG electrodes and the role of biocompatible surfactants fabrication additive on the bio-signal responses	645	Cholesterol biosynthesis inhibition	
Carbon nanotubes a promising new generation drug: A detailed journey in biochemical and biomedical fields	1157	The HMG-CoA reductase inhibitory potential of fatty acid amides	17
Carbon tetrachloride		Cholesterol synthesis inhibition	
Beta-caryophyllene ameliorates environmental toxicants-induced experimental nephrotoxicity through regulation of redox system and inflammation	138	Assessing the HMG-CoA reductase inhibitory potential of five fatty acids	969
Cardiac fibroblasts		Chromatin organization and DNA methylation	
CircHelz inhibition protects against angiotensin II-induced cardiac fibrosis <i>via</i> miR-29b modulation	7	Existence of differential epigenetic control in a pair of cultivated tobacco (<i>Nicotiana tabacum</i> L.) cultivars harbouring contrast nicotine levels-457	
Cardiac fibrosis			
CircHelz inhibition protects against angiotensin II-induced cardiac fibrosis <i>via</i> miR-29b modulation	7		

Chromatography-Mass Spectrometry		<i>Curcuma longa</i>	
Antimicrobial and antibiofilm potential of <i>Morus macroura</i> against <i>Streptococcus pneumoniae</i>	665	SSR marker-based genetic diversity assessment of turmeric (<i>Curcuma</i> spp.) germplasm lines for molecular characterization	1396
CircHelz		<i>CXCL9</i>	
CircHelz inhibition protects against angiotensin II-induced cardiac fibrosis <i>via</i> miR-29b modulation	7	Identification and <i>in silico</i> impact assessment of missense mutations in key genes associated with hypoxic stress in Changthangi goats	854
Cis-regulatory elements		Cyclic voltammetry	
Comprehensive <i>in silico</i> analysis of upstream sequences of <i>TaNRT2</i> gene family of bread wheat: Unveiling effects of hormonal cross-talk on differential homeolog expressions of <i>TaNRT2.1-6</i> under low nitrogen conditions	1187	Fabrication of an efficient hydroquinone biosensor with laccase immobilized on multiwalled carbon nanotubes	46
Colorectal Cancer		Cyclin-dependent kinase	
The phytochemicals present in <i>Vitex negundo</i> leaf extract transcriptionally regulates colorectal cancer: An <i>In vitro</i> study using HCT-116 cells	1015	CDK members and ribosomal proteins, a crucial role players in serous capillary ovarian cancer: Insights from gene expression and protein interaction networks	490
Complex III protein		Cystic fibrosis	
Bisphenol B: An inhibitor of mitochondrial electron transport chain protein	426	Neural network based prediction of site-specific stable mutants in wild type CFTR protein	511
Computational study		Cytochrome P450	
<i>In silico</i> approach for uncovering inhibitors of SARS-CoV-2 by targeting TMPRSS2 <i>via</i> molecular networking-based strategies	544	Computational analysis of <i>N2</i> -Aryl-1,2,3-triazoles as potential multi-target inhibitors	1129
Conformational ensemble		Cytokinin Oxidase/Dehydrogenase 2	
Force fields for simulating intrinsically disordered proteins: Assessing conformational sampling and structural dynamics	38	Marker and <i>CKX2</i> gene expression-based selection of high yielding tomato (<i>Lycopersicon esculentum</i> Mill.) germplasm	961
Copper oxide		Cytoscape	
Green synthesized copper oxide nanoparticles from <i>Ocimum tenuiflorum</i> fabricated in PVC for antibacterial, antioxidant, and anticancer biomedical applications	1092	Bioinformatic analysis of cervical cancer-associated hub genes and repurposing of 5-fluorouracil and gemcitabine as potential therapeutic agents	1258
Corona Virus		Cytotoxicity	
Comparative binding efficacy of Ivermectin and Remdesivir against the spike protein of Omicron variants: An <i>in silico</i> perspective	1369	Heterocyclic organic compounds extracted from <i>Artemisia judaica</i> (L.) induced caspase-dependent mitochondrial pathway in different breast and liver cancer cell lines: <i>In silico</i> and <i>in vitro</i> studies	1233
Coumarin derivatives		D-amino acid dehydrogenase	
<i>In silico</i> exploration of selected coumarin derivatives as potential antioxidant: Insights from DFT, NBO, Hirshfeld surface, ADMET profiling, Molecular docking and Dynamics simulations	827	Differences in d-amino acid metabolism mediated by d-amino acid dehydrogenase in autotrophic and heterotrophic cultures of the Sulfur-Oxidizing Bacterium <i>Starkeya novella</i>	955
COVID-19		D-amino acid	
<i>In silico</i> approach for uncovering inhibitors of SARS-CoV-2 by targeting TMPRSS2 <i>via</i> molecular networking-based strategies	544	Differences in d-amino acid metabolism mediated by d-amino acid dehydrogenase in autotrophic and heterotrophic cultures of the Sulfur-Oxidizing Bacterium <i>Starkeya novella</i>	955
CRISPR		Db8 wavelet	
CRISPR/Cas systems in therapeutics: Transforming gene editing into medical solutions	813	Mathematical modelling of time series data for tuberculosis notified cases in India using neural networks models: CNN, NNAR, and ANFIS models integrated with wavelets	1118
Computational tools for CRISPR Off-target detection: An overview	1047		
CRISPR-Cas		<i>DDx49</i>	
Advances in myogenic differentiation: Role of stem cells, RNA-binding proteins, Molecular pathways, and Detection techniques	301	Overexpression of <i>DDx49</i> promotes cell proliferation and associated with poor prognosis in liver cancer: <i>In silico</i> analysis	147

Deep learning		Disordered regions	
Computational tools for CRISPR Off-target detection: An overview	1047	Force fields for simulating intrinsically disordered proteins: Assessing conformational sampling and structural dynamics	38
Detoxification		Distribution	
Genomic and structural studies on S-Glutathione transferases to confer herbicide tolerance in rice through computational approach	533	Exploring benzothiazole derivatives: Promising PLK1 Inhibitors for cancer therapy through Virtual screening, Molecular docking, and ADMET evaluation	584
DFT		DNA amplification	
Spectroscopic study, Quantum Chemical Investigations, <i>In silico</i> and Drug Likeness of 4-Chloro-6,7-dimethoxyquinazoline: A potent study of new anti-alzheimer agent	406	Quantitative estimation of Pyrophosphate ions released during loop-mediated isothermal amplification	1101
GC-MS, DFT, LOL, ELF, NCI-RDG, kinetic energy, reactivity, stability, topological molecular descriptors evaluation on 2-propanone, 1-hydroxy-, Isopropyl alcohol and Glycerin: For NLO application	615	DNA binding domain	
Computational, Spectroscopic, Hirshfeld surface, Molecular docking and Topological studies on 2-bromo-5-methylpyridine as potent anti-cancer agent	683	Camptothecin exerts anti-cancer effects through FoxM1 Inhibition	331
Green synthesis, structural characterization, DFT, molecular docking and biological evaluation of some novel anti-cancer compounds	861	DNA interaction studies	
Diabetes mellitus		Exploration of DNA binding mode of Coumarin Glycoside Esculin by Multispectral and Molecular dynamics approaches	998
<i>Withania somnifera</i> modulates glucose metabolism by inhibiting SGLT2, α -glucosidase and α -amylase: An <i>in silico</i> and <i>in vitro</i> study	518	Docking study	
Diabetes		Green synthesis, structural characterization, DFT, molecular docking and biological evaluation of some novel anti-cancer compounds	861
Exploring the potential of <i>Laurus nobilis</i> as activators of insulin receptor activity	431	Antagonists binding at 5-HT _{3R_{AA}} , 5-HT _{3R_{AB}} and 5-HT _{3R_{AC}} can potentially counteract nicotine binding	919
Evaluation of marine algal sulphated polysaccharides as Glucose 6 phosphatase catalytic subunit 1 (G6PC1) inhibitors-A computational approach	896	Docking	
Diazotrophicus		Computational analysis of <i>N</i> 2-Aryl-1,2,3-triazoles as potential multi-target inhibitors	1129
Exploring the role of plant associating bacteria as bioinoculants and their beneficial effects in phytostimulation: A review	567	Exploring benzothiazole derivatives: Promising PLK1 Inhibitors for cancer therapy through Virtual screening, Molecular docking, and ADMET evaluation	584
Dietary fibre		Computational, Spectroscopic, Hirshfeld surface, Molecular docking and Topological studies on 2-bromo-5-methylpyridine as potent anti-cancer agent	683
Standardization of germination conditions for nutritional enhancement of underutilized basil seeds	391	Doxorubicin	
Diethyl nitrosamine		Adhesion G-protein-coupled receptor (GPCR) and Triple-negative breast cancer (TNBC): A new perspective for the therapeutic effect of GPR116 in TNBC	60
Beta-caryophyllene ameliorates environmental toxicants-induced experimental nephrotoxicity through regulation of redox system and inflammation	138	DPPH	
Differentially expressed gene		Zinc Oxide Nanorods from <i>Prunus domestica</i> L.: Bio-Assisted Synthesis, Characterization, Antioxidant and Cytotoxic Activities	78
Identification of hub genes in monocyte macrophages of high and low peak bone mass populations and early diagnostic biomarkers for osteoporosis	743	Drug designing	
Bioinformatic analysis of cervical cancer-associated hub genes and repurposing of 5-fluorouracil and gemcitabine as potential therapeutic agents	1258	Computational analysis of <i>N</i> 2-Aryl-1,2,3-triazoles as potential multi-target inhibitors	1129
Disease genomics		Drug discovery	
CRISPR/Cas systems in therapeutics: Transforming gene editing into medical solutions	813	Assessing the HMG-CoA reductase inhibitory potential of five fatty acids	969
		Virtual screening study to identify GSK-3 β inhibitors: A combined ligand-based and structure-based drug discovery approach	978
		Drug repurposing	
		A review on repurposing anti-diabetic drugs for the amelioration of betel-nut induced carcinogenesis	222

<i>In silico</i> approach for uncovering inhibitors of SARS-CoV-2 by targeting TMPRSS2 via molecular networking-based strategies	544	Electron transfer system	
Drug resistance		Differences in d-amino acid metabolism mediated by d-amino acid dehydrogenase in autotrophic and heterotrophic cultures of the Sulfur-Oxidizing Bacterium <i>Starkeya novella</i>	955
Transport mediated antibiotic resistance in <i>Mycobacterium tuberculosis</i>	267	Endometriosis	
Druggability		Umbilical endometriosis post-laparoscopic surgery: A case of subcutaneous seeding and neoumbilicus creation	1030
HMG-CoA Reductase inhibition targeted hypercholesterolemic potential of phytoconstituents of an aqueous shoot extract of <i>Calligonum polygonoides</i> L.: Insight from <i>in vitro</i> , <i>in vivo</i> and <i>in silico</i> assessments	935	Energy metabolism	
Drug-likeness		The influence of quantitative alterations of steroid hormones on energy metabolism of prostate tumors	349
Exploring the potential of <i>Laurus nobilis</i> as activators of insulin receptor activity	431	Entropy generation	
Green synthesis, structural characterization, DFT, molecular docking and biological evaluation of some novel anti-cancer compounds	861	Exploring MHD convective based SWCNT-MWCNT-GO ternary hybrid nanofluids with variable viscosity and exothermic reactions	766
Dyslipidemia		Environmental exposure	
Biochemical predictor for polycystic ovary syndrome	1032	Impact of lead acetate oral administration on wistar rat lung health: Histological evaluation	469
Eco-friendly		Environmental toxicity	
Green Synthesis of Nickel Oxide Nanoparticles using <i>Vitex negundo</i> Leaf for Antibacterial and Anti-inflammatory Activities	363	Beta-caryophyllene ameliorates environmental toxicants-induced experimental nephrotoxicity through regulation of redox system and inflammation	138
Eco-friendly plant based disease control: Exploring <i>Terminalia</i> species extracts as bio-pesticide against fungal pathogen	1410	Enzyme activity	
Ectopic		Bisphenol B: An inhibitor of mitochondrial electron transport chain protein	426
Umbilical endometriosis post-laparoscopic surgery: A case of subcutaneous seeding and neoumbilicus creation	1030	Enzyme assays	
Efficiency		Assessing the HMG-CoA reductase inhibitory potential of five fatty acids	969
The efficiency development of TiO ₂ and Henna dye-coated solar wafers by Pulsed Nd: YAG laser treatment	1382	The HMG-CoA reductase inhibitory potential of fatty acid amides	17
Efflux pumps		Enzyme inhibitors	
Transport mediated antibiotic resistance in <i>Mycobacterium tuberculosis</i>	267	Aryloxyacetic acid derivatives as inhibitors of the HPPD enzyme: A quantitative structure-activity relationship analysis	882
Phenotypic antibiotic resistance: Involvement of genes and additional factors	281	Epigenetic surveillance	
Electrocardiography		Environmental and lifestyle factors in epigenetic regulation of bladder cancer: Impact on CALCA and CCNA1 gene methylation	1389
Characterization of dry Graphite MWCNT hybrid ECG electrodes and the role of biocompatible surfactants fabrication additive on the bio-signal responses	645	ERK1	
Electrode		Unveiling the mitigating effect of matcha-silver nanoparticles on radiation-induced ovarian injury in rats	724
Synthesis and characterization of gold nanoparticle-mediated bamboo biochar nanocomposite-based electrode and analysis of its electrochemical behaviour	169	Esculin	
Characterization of dry Graphite MWCNT hybrid ECG electrodes and the role of biocompatible surfactants fabrication additive on the bio-signal responses	645	Exploration of DNA binding mode of Coumarin Glycoside Esculin by Multispectral and Molecular dynamics approaches	998
		Estradiol 17-beta-dehydrogenase	
		Investigating the role of phytochemicals from <i>Euphorbia pulcherrima</i> and <i>Ricinus communis</i> in modulating estradiol 17-beta -dehydrogenase 1 activity for breast cancer treatment	733
		<i>Euphorbia pulcherrima</i>	
		Investigating the role of phytochemicals from <i>Euphorbia pulcherrima</i> and <i>Ricinus communis</i> in modulating estradiol 17-beta -dehydrogenase 1 activity for breast cancer treatment	733

<i>Ex vivo</i> model		Forecasting	
From 2D to 3D: decoding tuberculosis pathobiology and drug development with <i>ex vivo</i> disease models	253	Mathematical modelling of time series data for tuberculosis notified cases in India using neural networks models: CNN, NNAR, and ANFIS models integrated with wavelets	1118
Excretion		FoxM1 inhibitors	
Exploring benzothiazole derivatives: Promising PLK1 Inhibitors for cancer therapy through Virtual screening, Molecular docking, and ADMET evaluation	584	Camptothecin exerts anti-cancer effects through FoxM1 Inhibition	331
Exosomes		FT-IR	
BMSC-derived exosomes regulate the miR-133b/NLRP3 axis to protect against injury to the spinal cord	654	Quantum chemical analysis and anticancer evaluation of 1,4-benzenedicarboxylic acid bis(2-Ethylhexyl) ester: Topological indices, reduced density gradient, molecular electrostatic potential, natural bond orbital	1325
Fasting blood sugar		FTIR	
Biochemical predictor for polycystic ovary syndrome	1032	Zinc Oxide Nanorods from <i>Prunus domestica</i> L.: Bio-Assisted Synthesis, Characterization, Antioxidant and Cytotoxic Activities	78
Fatty acids		Fuoidan	
Identification of potential therapeutic targets of fatty acids for inflammatory bowel diseases: An <i>in silico</i> approach	754	Evaluation of marine algal sulphated polysaccharides as Glucose 6 phosphatase catalytic subunit 1 (G6PC1) inhibitors-A computational approach	896
Ferroptosis		Fungal infection	
Regulatory role of SLC3A2 in Ferroptosis and its impact on head and neck squamous cell carcinoma: A bioinformatics study	1069	Phyto-fabrication and characterization of silver nanoparticles from <i>Trachyspermum ammi</i> (Ajwain) seeds and assessment of their antifungal activity	1429
Fertilizers		G6PD variant	
Exploring the role of plant associating bacteria as bioinoculants and their beneficial effects in phytostimulation: A review	567	Structural analysis of Glucose-6-Phosphate Dehydrogenase (G6PD) variants from Northeast India and natural antioxidants as a pharmacological agent to alleviate G6PD deficiency associated challenges- An <i>in silico</i> approach	25
FE-SEM		<i>Galleria mellonella</i>	
Zinc Oxide Nanorods from <i>Prunus domestica</i> L.: Bio-Assisted Synthesis, Characterization, Antioxidant and Cytotoxic Activities	78	Investigations on novel aedesin-derived peptides against ESKAPE pathogens	1142
<i>Ficus lacor</i>		Gamma radiation	
Evaluation of osteogenic activity of Plaksha (<i>Ficus lacor</i> Buch. Ham.) stem bark on human dental pulp derived mesenchymal stem cells	131	Unveiling the mitigating effect of matcha-silver nanoparticles on radiation-induced ovarian injury in rats	724
Field screening		GC-MS analysis	
Morpho-molecular screening of chickpea (<i>Cicer arietinum</i> L.) genotypes for resistance to <i>Botrytis</i> grey mould disease	381	Insights into anti-tuberculosis activity of partially purified bioactive fraction from <i>Vitex negundo</i> L. petroleum ether extracts against <i>Mycobacterium smegmatis</i> -An <i>in vitro</i> and <i>in silico</i> approach	1077
Finite element method		<i>Withania somnifera</i> modulates glucose metabolism by inhibiting SGLT2, α -glucosidase and α -amylase: An <i>in silico</i> and <i>in vitro</i> study	518
Advanced photonic crystal fiber-based surface plasmon resonance biosensors for transformative RI sensing	54	GC-MS	
Flow Cytometry		GC-MS, DFT, LOL, ELF, NCI-RDG, kinetic energy, reactivity, stability, topological molecular descriptors evaluation on 2-propanone, 1-hydroxy-, Isopropyl alcohol and Glycerin: For NLO application	615
Benzo (a)pyrene exposure reduces CD54 expression on alveolar macrophages and alters apoptosis and inflammatory responses in the lungs	607		
Follicle stimulating hormone (FSH)			
Biochemical predictor for polycystic ovary syndrome	1032		
Food security			
Structure-based inhibition of <i>Rhizoctonia solani</i> in rice sheath blight Beta-glucosidase by natural terpenoids	1351		

Green synthesis, structural characterization, DFT, molecular docking and biological evaluation of some novel anti-cancer compounds	861	Glucose homeostasis Evaluation of marine algal sulphated polysaccharides as Glucose 6 phosphatase catalytic subunit 1 (G6PC1) inhibitors-A computational approach	896
Gene editing CRISPR/Cas systems in therapeutics: Transforming gene editing into medical solutions	813	Glutathione peroxidase 4 Regulatory role of SLC3A2 in Ferroptosis and its impact on head and neck squamous cell carcinoma: A bioinformatics study	1069
Gene expression omnibus Bioinformatic analysis of cervical cancer-associated hub genes and repurposing of 5-fluorouracil and gemcitabine as potential therapeutic agents	1258	Glutathione Regulatory role of SLC3A2 in Ferroptosis and its impact on head and neck squamous cell carcinoma: A bioinformatics study	1069
Gene expression Benzo (a)pyrene exposure reduces CD54 expression on alveolar macrophages and alters apoptosis and inflammatory responses in the lungs	607	Glutathione-S-transferase Genomic and structural studies on S-Glutathione transferases to confer herbicide tolerance in rice through computational approach	533
Gene ontology Identification of potential therapeutic targets of fatty acids for inflammatory bowel diseases: An <i>in silico</i> approach	754	Glycogen levels, Lead acetate Impact of lead acetate oral administration on wistar rat lung health: Histological evaluation	469
Gene ontology The phytochemicals present in <i>Vitex negundo</i> leaf extract transcriptionally regulates colorectal cancer: An <i>In vitro</i> study using HCT-116 cells	1015	Glycogenolysis Evaluation of marine algal sulphated polysaccharides as Glucose 6 phosphatase catalytic subunit 1 (G6PC1) inhibitors-A computational approach	896
Genetic diversity Marker and <i>CKX2</i> gene expression-based selection of high yielding tomato (<i>Lycopersicon esculentum</i> Mill.) germplasms	961	Glycolysis The influence of quantitative alterations of steroid hormones on energy metabolism of prostate tumors	349
SSR marker-based genetic diversity assessment of turmeric (<i>Curcuma</i> spp.) germplasm lines for molecular characterization	1396	Gold particles Biohybrid molecules: Integrating natural and synthetic components for advanced biochemical applications	107
Genome editing Computational tools for CRISPR Off-target detection: An overview	1047	GPR116 Adhesion G-protein-coupled receptor (GPCR) and Triple-negative breast cancer (TNBC): A new perspective for the therapeutic effect of GPR116 in TNBC	60
Germplasm conservation SSR marker-based genetic diversity assessment of turmeric (<i>Curcuma</i> spp.) germplasm lines for molecular characterization	1396	G-protein-coupled receptor Adhesion G-protein-coupled receptor (GPCR) and Triple-negative breast cancer (TNBC): A new perspective for the therapeutic effect of GPR116 in TNBC	60
GH9 Localization of cellulolytic system and <i>de novo</i> transcriptome analysis of whole larval gut of <i>Zophobas morio</i> (Coleoptera: Tenebrionidae) disclosed the existence of glycosyl hydrolase family-9	69	G-quadruplex structure Chromatin higher order structure and possible therapeutic target	237
Gibberellic acid (GA ₃) Comprehensive <i>in silico</i> analysis of upstream sequences of <i>TaNRT2</i> gene family of bread wheat: Unveiling effects of hormonal cross-talk on differential homeolog expressions of <i>TaNRT2.1-6</i> under low nitrogen conditions	1187	Granuloma From 2D to 3D: decoding tuberculosis pathobiology and drug development with <i>ex vivo</i> disease models	253
Gluconeogenesis Evaluation of marine algal sulphated polysaccharides as Glucose 6 phosphatase catalytic subunit 1 (G6PC1) inhibitors-A computational approach	896	Green energy Synthesis and characterization of gold nanoparticle-mediated bamboo biochar nanocomposite-based electrode and analysis of its electrochemical behaviour	169

Green synthesis		HEPG2 cell lines	
Synthesis and characterization of gold nanoparticle-mediated bamboo biochar nanocomposite-based electrode and analysis of its electrochemical behaviour	169	Investigations on novel aedesin-derived peptides against ESKAPE pathogens	1142
Phyto-fabrication and characterization of silver nanoparticles from <i>Trachyspermum ammi</i> (Ajwain) seeds and assessment of their antifungal activity	1429	Herbicide	
		Genomic and structural studies on S-Glutathione transferases to confer herbicide tolerance in rice through computational approach	533
Groove binding mode		High-affinity nitrate transporter (NRT2)	
Exploration of DNA binding mode of Coumarin Glycoside Esculin by Multispectral and Molecular dynamics approaches	998	Comprehensive <i>in silico</i> analysis of upstream sequences of <i>TaNRT2</i> gene family of bread wheat: Unveiling effects of hormonal cross-talk on differential homeolog expressions of <i>TaNRT2.1-6</i> under low nitrogen conditions	1187
Growth factor		Himalayan region	
Insight into the etiology of preeclampsia	449	Detection of root-knot nematode disease in cucumber under protected cultivation in Kumaon region	1299
GSK-3 β inhibitors		Histological changes	
Virtual screening study to identify GSK-3 β inhibitors: A combined ligand-based and structure-based drug discovery approach	978	Lipid peroxidation level and histological changes in rat liver after the cisplatin and dexamethasone separate and combined action	480
Guide RNA		Histone deacetylase 8	
Computational tools for CRISPR Off-target detection: An overview	1047	Computational analysis of <i>N2</i> -Aryl-1,2,3-triazoles as potential multi-target inhibitors	1129
Guillain-Barré Syndrome (GBS)		HMG-CoA reductase	
Immune system involvement and neuropathology in Guillain-barré syndrome: Approaches to therapy	1315	HMG-CoA Reductase inhibition targeted hypercholesterolemic potential of phytoconstituents of an aqueous shoot extract of <i>Calligonum polygonoides</i> L.: Insight from <i>in vitro</i> , <i>in vivo</i> and <i>in silico</i> assessments	935
H ₂ O ₂		hnRNPs	
Zinc Oxide Nanorods from <i>Prunus domestica</i> L.: Bio-Assisted Synthesis, Characterization, Antioxidant and Cytotoxic Activities	78	Advances in myogenic differentiation: Role of stem cells, RNA-binding proteins, Molecular pathways, and Detection techniques	301
<i>Halymenia refugium</i>		Homology models	
Extraction, purification, and bioevaluation of phycoerythrin from <i>Halymenia refugium</i> against pathogenic bacteria and A549 lung cancer cell line	1277	Antagonists binding at 5-HT ₃ R _{AA} , 5-HT ₃ R _{AB} and 5-HT ₃ R _{AC} can potentially counteract nicotine binding	919
Heat source		HTVS	
Exploring MHD convective based SWCNT-MWCNT-GO ternary hybrid nanofluids with variable viscosity and exothermic reactions	766	Virtual screening study to identify GSK-3 β inhibitors: A combined ligand-based and structure-based drug discovery approach	978
Heat transfer		Human dental pulp stem cells	
Exploring MHD convective based SWCNT-MWCNT-GO ternary hybrid nanofluids with variable viscosity and exothermic reactions	766	Evaluation of osteogenic activity of Plaksha (<i>Ficus lacor</i> Buch. Ham.) stem bark on human dental pulp derived mesenchymal stem cells	131
Hemocompatibility		Hydrogels	
Phyto-fabrication and characterization of silver nanoparticles from <i>Trachyspermum ammi</i> (Ajwain) seeds and assessment of their antifungal activity	1429	Self-assembly of novel ureido dipeptide esters and investigation of its gelation property	909
Henna DSSM		Hydrophobic	
The efficiency development of TiO ₂ and Henna dye-coated solar wafers by Pulsed Nd: YAG laser treatment	1382	Exploring the therapeutic potential of Zonisamide derivatives through molecular docking and dynamic studies with GABARAP	786
Hepatotoxicity			
Lipid peroxidation level and histological changes in rat liver after the cisplatin and dexamethasone separate and combined action	480		

Hypercholesterolemia		Inflammatory bowel disease	
HMG-CoA Reductase inhibition targeted	935	Identification of potential therapeutic targets of fatty acids for inflammatory bowel diseases: An <i>in silico</i> approach	754
hypercholesterolemic potential of phytoconstituents of an aqueous shoot extract of <i>Calligonum polygonoides</i> L.: Insight from <i>in vitro</i> , <i>in vivo</i> and <i>in silico</i> assessments		Inhibition	
		Inhibition of Botulinum neurotoxin A protease activity by Quercetagenin	161
Hyperglycemia		Inhibitors	
Circulating myokines and apelin-13 levels as predictive biomarkers for newly diagnosed type 2 diabetes mellitus	798	Phosphodiesterase 4 as a candidate therapeutic target of cancer	213
Hyperinsulinemia		Insulin resistance	
Circulating myokines and apelin-13 levels as predictive biomarkers for newly diagnosed type 2 diabetes mellitus	798	Circulating myokines and apelin-13 levels as predictive biomarkers for newly diagnosed type 2 diabetes mellitus	798
Illumina		Insulin	
Localization of cellulolytic system and <i>de novo</i> transcriptome analysis of whole larval gut of <i>Zophobas morio</i> (Coleoptera: Tenebrionidae) disclosed the existence of glycosyl hydrolase family-9	69	Exploring the potential of <i>Laurus nobilis</i> as activators of insulin receptor activity	431
Imaging		Integrative taxonomy	
Advances in myogenic differentiation: Role of stem cells, RNA-binding proteins, Molecular pathways, and Detection techniques	301	Detection of root-knot nematode disease in cucumber under protected cultivation in Kumaon region	1299
Immobilization		Iron content	
Fabrication of an efficient hydroquinone biosensor with laccase immobilized on multiwalled carbon nanotubes	46	Structural elucidation and evaluation of antioxidant and <i>In vitro</i> anti-hemolytic properties of polysaccharide-iron complexes from <i>Piper betel</i> and <i>Triticum aestivum</i>	88
Immune response		Iron	
Predictive analysis of structural interaction among HIV-1 proteins and Class I MHC molecule: A computational approach for therapeutic target	1198	Structural elucidation and evaluation of antioxidant and <i>In vitro</i> anti-hemolytic properties of polysaccharide-iron complexes from <i>Piper betel</i> and <i>Triticum aestivum</i>	88
Immunological triggers		Isovitexin	
Immune system involvement and neuropathology in Guillain-barré syndrome: Approaches to therapy	1315	Exploration of phytochemical compounds from Millets as NRF2 activators using molecular docking and molecular dynamics simulation approaches	372
<i>In silico</i> docking analysis		ISSR Marker	
Inhibition of Botulinum neurotoxin A protease activity by Quercetagenin	161	Marker and <i>CKX2</i> gene expression-based selection of high yielding tomato (<i>Lycopersicon esculentum</i> Mill.) germplasms	961
<i>In silico</i> study		ITS	
Integrating network pharmacology and molecular docking to assess <i>Catharanthus roseus</i> as a natural alternative for leukemia therapy	1211	Detection of root-knot nematode disease in cucumber under protected cultivation in Kumaon region	1299
<i>In silico</i>		Ivermectin	
Computational insights into Curcumin's modulation of Epithelial-mesenchymal transition in pulmonary fibrosis	1111	Comparative binding efficacy of Ivermectin and Remdesivir against the spike protein of Omicron variants: An <i>in silico</i> perspective	1369
Inflammation		Kaempferol	
Beta-caryophyllene ameliorates environmental toxicants-induced experimental nephrotoxicity through regulation of redox system and inflammation	138	Exploration of phytochemical compounds from Millets as NRF2 activators using molecular docking and molecular dynamics simulation approaches	372
Benzo (a)pyrene exposure reduces CD54 expression on alveolar macrophages and alters apoptosis and inflammatory responses in the lungs	607	Laccase assay	
		Fabrication of an efficient hydroquinone biosensor with laccase immobilized on multiwalled carbon nanotubes	46

Ladakh		Mar operon	
Identification and <i>in silico</i> impact assessment of missense mutations in key genes associated with hypoxic stress in Changthangi goats	854	Phenotypic antibiotic resistance: Involvement of genes and additional factors	281
Leukemia disease		Marine metabolites	
Integrating network pharmacology and molecular docking to assess <i>Catharanthus roseus</i> as a natural alternative for leukemia therapy	1211	Marine natural products as novel therapeutic approaches in Psoriasis: A comprehensive review	1056
Leukocyte		Masson trichome	
Biochemical predictor for polycystic ovary syndrome	1032	HMG-CoA Reductase inhibition targeted hypercholesterolemic potential of phytoconstituents of an aqueous shoot extract of <i>Calligonum polygonoides</i> L.: Insight from <i>in vitro</i> , <i>in vivo</i> and <i>in silico</i> assessments	935
Leutenizing hormone (LH)		MATLAB	
Biochemical predictor for polycystic ovary syndrome	1032	Mathematical modelling of time series data for tuberculosis notified cases in India using neural networks models: CNN, NNAR, and ANFIS models integrated with wavelets	1118
Ligand		MBNL	
Chromatin higher order structure and possible therapeutic target	237	Advances in myogenic differentiation: Role of stem cells, RNA-binding proteins, Molecular pathways, and Detection techniques	301
Limit of detection		MD simulations	
Quantitative estimation of Pyrophosphate ions released during loop-mediated isothermal amplification	1101	Identification of novel compound against STAT3 mediated liver fibrosis: An MD simulation based study	178
Lipids		MDA-MB 231 cells	
Assessing the HMG-CoA reductase inhibitory potential of five fatty acids	969	Adhesion G-protein-coupled receptor (GPCR) and Triple-negative breast cancer (TNBC): A new perspective for the therapeutic effect of GPR116 in TNBC	60
Lipinski rule		Medicine	
Exploring benzothiazole derivatives: Promising PLK1 Inhibitors for cancer therapy through Virtual screening, Molecular docking, and ADMET evaluation	584	CRISPR/Cas systems in therapeutics: Transforming gene editing into medical solutions	813
Liver cancer		<i>Meloidogyne</i>	
Overexpression of <i>DDx49</i> promotes cell proliferation and associated with poor prognosis in liver cancer: <i>In silico</i> analysis	147	Detection of root-knot nematode disease in cucumber under protected cultivation in Kumaon region	1299
Lon protease		Mesenchymal stem cells	
Phenotypic antibiotic resistance: Involvement of genes and additional factors	281	Evaluation of osteogenic activity of Plaksha (<i>Ficus lacor</i> Buch. Ham.) stem bark on human dental pulp derived mesenchymal stem cells	131
Lung cancer		Metabolic proteins	
Benzo (a)pyrene exposure reduces CD54 expression on alveolar macrophages and alters apoptosis and inflammatory responses in the lungs	607	<i>In silico</i> based profiling and characterization of functional microRNAs and their crucial targets in <i>Saccharum officinarum</i>	154
Lung histoarchitecture		Metabolism	
Impact of lead acetate oral administration on wistar rat lung health: Histological evaluation	469	Exploring benzothiazole derivatives: Promising PLK1 Inhibitors for cancer therapy through Virtual screening, Molecular docking, and ADMET evaluation	584
Malondialdehyde		Metastasis	
Lipid peroxidation level and histological changes in rat liver after the cisplatin and dexamethasone separate and combined action	480	Phosphodiesterase 4 as a candidate therapeutic target of cancer	213
Mammalian			
Tracing the evolutionary history of novel hormone asprosin: An <i>in silico</i> study across vertebrates	700		
MaQxan™ (20:2)			
Evaluation of <i>Tagetes Erecta</i> (Marigold) Extract (MaQxan™ (20:2)) potency in induced learning and memory deficit by modulating neurotransmission and synaptic plasticity	355		

Virtual screening and molecular dynamic simulation to identify the potent SOX2-inhibiting drugs	596	MMGBSA calculations	
		Exploration of DNA binding mode of Coumarin Glycoside Esculin by Multispectral and Molecular dynamics approaches	998
Methyl orange		Modulator	
Study of antibacterial and photocatalytic potential of phytomediatially synthesized ZnO nanoparticles from <i>Prunus domestica</i> L.	1417	Exploring the therapeutic potential of Zonisamide derivatives through molecular docking and dynamic studies with GABARAP	786
Methylation-specific PCR		Molecular docking & simulation	
Environmental and lifestyle factors in epigenetic regulation of bladder cancer: Impact on CALCA and CCNA1 gene methylation	1389	Virtual screening of rice phytochemical scaffolds targeting peptide deformylase of <i>Xanthomonas Oryzae</i> pv. <i>Oryzae</i> for the control of bacterial leaf blight	1220
Methylene blue		Molecular docking	
Study of antibacterial and photocatalytic potential of phytomediatially synthesized ZnO nanoparticles from <i>Prunus domestica</i> L.	1417	Structural analysis of Glucose-6-Phosphate Dehydrogenase (G6PD) variants from Northeast India and natural antioxidants as a pharmacological agent to alleviate G6PD deficiency associated challenges- An <i>in silico</i> approach	25
Microbial fuel cell		<i>In silico</i> molecular docking and virtual screening of natural compounds against Tubulin-7-Aminonoscapine complex (6Y6D) for estimation of anticancer potential	117
Synthesis and characterization of gold nanoparticle-mediated bamboo biochar nanocomposite-based electrode and analysis of its electrochemical behaviour	169	Identification of novel compound against STAT3 mediated liver fibrosis: An MD simulation based study	178
Microwaves		Computational screening of FDA-approved and natural compounds against MpoX Dual specificity protein phosphatase (H1)	398
Size-driven fluorescent properties in Nanophotonics	1290	Spectroscopic study, Quantum Chemical Investigations, <i>In silico</i> and Drug Likeness of 4-Chloro-6,7-dimethoxyquinazoline: A potent study of new anti-alzheimer agent	406
Millets		Bisphenol B: An inhibitor of mitochondrial electron transport chain protein	426
Exploration of phytochemical compounds from Millets as NRF2 activators using molecular docking and molecular dynamics simulation approaches	372	Exploring the potential of <i>Laurus nobilis</i> as activators of insulin receptor activity	431
Minerals		Neural network based prediction of site-specific stable mutants in wild type CFTR protein	511
Standardization of germination conditions for nutritional enhancement of underutilized basil seeds	391	<i>Withania somnifera</i> modulates glucose metabolism by inhibiting SGLT2, α -glucosidase and α -amylase: An <i>in silico</i> and <i>in vitro</i> study	518
Minimal inhibitory concentration		<i>In silico</i> approach for uncovering inhibitors of SARS-CoV-2 by targeting TMPRSS2 <i>via</i> molecular networking-based strategies	544
Investigations on novel aedesin-derived peptides against ESKAPE pathogens	1142	Pharmacoinformatic based screening of phytochemicals from <i>Ashwagandha</i> (<i>Withania somnifera</i>) against serine/arginine splicing factor 1 protein in treatment of pancreatic cancer	632
miR-133b		<i>In silico</i> exploration of selected coumarin derivatives as potential antioxidant: Insights from DFT, NBO, Hirshfeld surface, ADMET profiling, Molecular docking and Dynamics simulations	827
BMSC-derived exosomes regulate the miR-133b/NLRP3 axis to protect against injury to the spinal cord	654	Ajmaline-acetylcholinesterase interaction: Insights from Docking, Molecular dynamics, and Predictive machine learning models	990
miR-29b		Computational insights into Curcumin's modulation of Epithelial-mesenchymal transition in pulmonary fibrosis	1111
CircHelz inhibition protects against angiotensin II-induced cardiac fibrosis <i>via</i> miR-29b modulation	7		
miRNA			
<i>In silico</i> based profiling and characterization of functional microRNAs and their crucial targets in <i>Saccharum officinarum</i>	154		
Identification of hub genes in monocyte macrophages of high and low peak bone mass populations and early diagnostic biomarkers for osteoporosis	743		
Mitochondria			
An overview of response pathways for protection of mitochondria from protein misfolding stress	287		
Bisphenol B: An inhibitor of mitochondrial electron transport chain protein	426		
Mitophagy			
An overview of response pathways for protection of mitochondria from protein misfolding stress	287		

Quantum chemical analysis and anticancer evaluation of 1,4-benzenedicarboxylic acid bis(2-Ethylhexyl) ester: Topological indices, reduced density gradient, molecular electrostatic potential, natural bond orbital	1325	MTT Zinc Oxide Nanorods from <i>Prunus domestica</i> L.: Bio-Assisted Synthesis, Characterization, Antioxidant and Cytotoxic Activities	78
Comparative binding efficacy of Ivermectin and Remdesivir against the spike protein of Omicron variants: An <i>in silico</i> perspective	1369	Multiwalled carbon nanotubes Fabrication of an efficient hydroquinone biosensor with laccase immobilized on multiwalled carbon nanotubes	46
Molecular dynamic simulation			
Structural analysis of Glucose-6-Phosphate Dehydrogenase (G6PD) variants from Northeast India and natural antioxidants as a pharmacological agent to alleviate G6PD deficiency associated challenges- An <i>in silico</i> approach	25	Mycelial morphology <i>Aspergillus niger</i> acidogenic metabolism: A biased view from the C and N interface	321
Force fields for simulating intrinsically disordered proteins: Assessing conformational sampling and structural dynamics	38	<i>Mycobacterium tuberculosis</i> From 2D to 3D: decoding tuberculosis pathobiology and drug development with <i>ex vivo</i> disease models	253
Computational screening of FDA-approved and natural compounds against Mpox Dual specificity protein phosphatase (H1)	398	Transport mediated antibiotic resistance in <i>Mycobacterium tuberculosis</i>	267
Understanding the conformational dynamics of an intrinsically disordered protein bound to a small molecule	712	Mycolic acid synthesis proteins Insights into anti-tuberculosis activity of partially purified bioactive fraction from <i>Vitex negundo</i> L. petroleum ether extracts against <i>Mycobacterium smegmatis</i> -An <i>in vitro</i> and <i>in silico</i> approach	1077
Virtual screening study to identify GSK-3 β inhibitors: A combined ligand-based and structure-based drug discovery approach	978	<i>N2</i> -Aryl-1,2,3-triazoles Computational analysis of <i>N2</i> -Aryl-1,2,3-triazoles as potential multi-target inhibitors	1129
Insights into anti-tuberculosis activity of partially purified bioactive fraction from <i>Vitex negundo</i> L. petroleum ether extracts against <i>Mycobacterium smegmatis</i> -An <i>in vitro</i> and <i>in silico</i> approach	1077	NADPH Structural analysis of Glucose-6-Phosphate Dehydrogenase (G6PD) variants from Northeast India and natural antioxidants as a pharmacological agent to alleviate G6PD deficiency associated challenges- An <i>in silico</i> approach	25
Molecular dynamics			
Spectroscopic study, Quantum Chemical Investigations, <i>In silico</i> and Drug Likeness of 4-Chloro-6,7-dimethoxyquinazoline: A potent study of new anti-alzheimer agent	406	Nanog Potential effects of hesperidin isolated from <i>Zanthoxylum rhetsa</i> against NTERA-2 cancer stem cells	502
<i>In silico</i> exploration of selected coumarin derivatives as potential antioxidant: Insights from DFT, NBO, Hirshfeld surface, ADMET profiling, Molecular docking and Dynamics simulations	827	Nanogel Phyto-fabrication and characterization of silver nanoparticles from <i>Trachyspermum ammi</i> (Ajwain) seeds and assessment of their antifungal activity	1429
Heterocyclic organic compounds extracted from <i>Artemisia judaica</i> (L.) induced caspase-dependent mitochondrial pathway in different breast and liver cancer cell lines: <i>In silico</i> and <i>in vitro</i> studies	1233	Nanomaterials Biohybrid molecules: Integrating natural and synthetic components for advanced biochemical applications	107
Molecular modelling			
Predictive analysis of structural interaction among HIV-1 proteins and Class I MHC molecule: A computational approach for therapeutic target	1198	Nanoparticle Green biosynthesis, characterization, and anticancer activity of <i>Sargassum cinctum</i> zinc nanoparticles	187
Molecular networking			
<i>In silico</i> approach for uncovering inhibitors of SARS-CoV-2 by targeting TMPRSS2 via molecular networking-based strategies	544	Study of antibacterial and photocatalytic potential of phytomedically synthesized ZnO nanoparticles from <i>Prunus domestica</i> L.	1417
<i>Morus macroura</i> - Extract			
Antimicrobial and antibiofilm potential of <i>Morus macroura</i> against <i>Streptococcus pneumoniae</i>	665	Green synthesized copper oxide nanoparticles from <i>Ocimum tenuiflorum</i> fabricated in PVC for antibacterial, antioxidant, and anticancer biomedical applications	1092
MRPL22			
Identification and <i>in silico</i> impact assessment of missense mutations in key genes associated with hypoxic stress in Changthangi goats	854	Nanostructures Self-assembly of novel ureido dipeptide esters and investigation of its gelation property	909

Nanotechnology		NLO	
Green Synthesis of Nickel Oxide Nanoparticles using <i>Vitex negundo</i> Leaf for Antibacterial and Anti-inflammatory Activities	363	GC-MS, DFT, LOL, ELF, NCI-RDG, kinetic energy, reactivity, stability, topological molecular descriptors evaluation on 2-propanone, 1-hydroxy-, Isopropyl alcohol and Glycerin: For NLO application	615
Natural products		NLRP3 inflammasome	
Computational screening of FDA-approved and natural compounds against Mpox Dual specificity protein phosphatase (H1)	398	BMSC-derived exosomes regulate the miR-133b/NLRP3 axis to protect against injury to the spinal cord	654
Nd: YAG pulsed laser		NMA analysis	
The efficiency development of TiO ₂ and Henna dye-coated solar wafers by Pulsed Nd: YAG laser treatment	1382	Virtual screening and molecular dynamic simulation to identify the potent SOX2-inhibiting drugs	596
Neumbilicus		Non canonical DNA	
Umbilical endometriosis post-laparoscopic surgery: A case of subcutaneous seeding and neumbilicus creation	1030	Chromatin higher order structure and possible therapeutic target	237
Nephrotoxicity		Non-vertebrates	
Beta-caryophyllene ameliorates environmental toxicants-induced experimental nephrotoxicity through regulation of redox system and inflammation	138	Tracing the evolutionary history of novel hormone asprosin: An <i>in silico</i> study across vertebrates	700
Neurodegeneration		Notch	
Ajmaline-acetylcholinesterase interaction: Insights from Docking, Molecular dynamics, and Predictive machine learning models	990	Advances in myogenic differentiation: Role of stem cells, RNA-binding proteins, Molecular pathways, and Detection techniques	301
Neuropathic consequences		NRF2	
Immune system involvement and neuropathology in Guillain-barré syndrome: Approaches to therapy	1315	Exploration of phytochemical compounds from Millets as NRF2 activators using molecular docking and molecular dynamics simulation approaches	372
Neurotransmission		Obesity	
Evaluation of <i>Tagetes Erecta</i> (Marigold) Extract (MaQxan™ (20:2)) potency in induced learning and memory deficit by modulating neurotransmission and synaptic plasticity	355	Circulating myokines and apelin-13 levels as predictive biomarkers for newly diagnosed type 2 diabetes mellitus	798
Nickel Oxide Nanoparticles		Occupational exposure	
Green Synthesis of Nickel Oxide Nanoparticles using <i>Vitex negundo</i> Leaf for Antibacterial and Anti-inflammatory Activities	363	Environmental and lifestyle factors in epigenetic regulation of bladder cancer: Impact on CALCA and CCNA1 gene methylation	1389
Nicotine antagonists		<i>Ocimum tenuiflorum</i>	
Antagonists binding at 5-HT _{3R_{AA}} , 5-HT _{3R_{AB}} and 5-HT _{3R_{AC}} can potentially counteract nicotine binding	919	Green synthesized copper oxide nanoparticles from <i>Ocimum tenuiflorum</i> fabricated in PVC for antibacterial, antioxidant, and anticancer biomedical applications	1092
Nicotine		Oct4	
Existence of differential epigenetic control in a pair of cultivated tobacco (<i>Nicotiana tabacum</i> L.) cultivars harbouring contrast nicotine levels-457		Potential effects of hesperidin isolated from <i>Zanthoxylum rhetsa</i> against NTERA-2 cancer stem cells	502
Nitric oxide		Oestrogen-sensitive cancers	
Insight into the etiology of preeclampsia	449	Heterocyclic organic compounds extracted from <i>Artemisia judaica</i> (L.) induced caspase-dependent mitochondrial pathway in different breast and liver cancer cell lines: <i>In silico</i> and <i>in vitro</i> studies	1233
Nitrogen metabolism		Off-target	
<i>Aspergillus niger</i> acidogenic metabolism: A biased view from the C and N interface	321	Computational tools for CRISPR Off-target detection: An overview	1047
Nitrogen starvation		Oleamide	
<i>Aspergillus niger</i> acidogenic metabolism: A biased view from the C and N interface	321	The HMG-CoA reductase inhibitory potential of fatty acid amides	17

Omicron		Pancreatic cancer	
Comparative binding efficacy of Ivermectin and Remdesivir against the spike protein of Omicron variants: An <i>in silico</i> perspective	1369	Pharmacoinformatic based screening of phytochemicals from <i>Ashwagandha (Withania somnifera)</i> against serine/arginine splicing factor 1 protein in treatment of pancreatic cancer	632
O-phenylenediamine		PDB ID:6Y6D	
Quantitative estimation of Pyrophosphate ions released during loop-mediated isothermal amplification	1101	<i>In silico</i> molecular docking and virtual screening of natural compounds against Tubulin-7-Aminonoscaphine complex (6Y6D) for estimation of anticancer potential	117
Oral activity		PDMeOH-ZnONRs	
Exploring the therapeutic potential of Zonisamide derivatives through molecular docking and dynamic studies with GABARAP	786	Zinc Oxide Nanorods from <i>Prunus domestica</i> L.: Bio-Assisted Synthesis, Characterization, Antioxidant and Cytotoxic Activities	78
Organoid		PE_PPE family	
From 2D to 3D: decoding tuberculosis pathobiology and drug development with <i>ex vivo</i> disease models	253	Transport mediated antibiotic resistance in <i>Mycobacterium tuberculosis</i>	267
Osteogenesis		PEGylation	
Evaluation of osteogenic activity of Plaksha (<i>Ficus lacor</i> Buch. Ham.) stem bark on human dental pulp derived mesenchymal stem cells	131	Biohybrid molecules: Integrating natural and synthetic components for advanced biochemical applications	107
Osteonectin		Peroxidase activity	
Evaluation of osteogenic activity of Plaksha (<i>Ficus lacor</i> Buch. Ham.) stem bark on human dental pulp derived mesenchymal stem cells	131	Size-driven fluorescent properties in Nanophotonics	1290
Ovarian cancer		PGP bacteria	
CDK members and ribosomal proteins, a crucial role players in serous capillary ovarian cancer: Insights from gene expression and protein interaction networks	490	Exploring the role of plant associating bacteria as bioinoculants and their beneficial effects in phytostimulation: A review	567
OVX		Pharmacophore modelling	
Identification of hub genes in monocyte macrophages of high and low peak bone mass populations and early diagnostic biomarkers for osteoporosis	743	<i>In silico</i> approach for uncovering inhibitors of SARS-CoV-2 by targeting TMPRSS2 via molecular networking-based strategies	544
Oxidative stress		Phosphatase inhibitors	
Beta-caryophyllene ameliorates environmental toxicants-induced experimental nephrotoxicity through regulation of redox system and inflammation	138	Computational screening of FDA-approved and natural compounds against MpoX Dual specificity protein phosphatase (H1)	398
The effects of lipoic acid on rat submandibular salivary gland in valproic acid induced oxidative stress	576	Phosphodiesterase 4	
p53 pathway		Phosphodiesterase 4 as a candidate therapeutic target of cancer	213
Potential effects of hesperidin isolated from <i>Zanthoxylum rhetsa</i> against NTERA-2 cancer stem cells	502	Phycoerythrin	
p53		Extraction, purification, and bioevaluation of phycoerythrin from <i>Halymenia refugium</i> against pathogenic bacteria and A549 lung cancer cell line	1277
Unveiling the mitigating effect of matcha-silver nanoparticles on radiation-induced ovarian injury in rats	724	Physicochemical properties	
Palustric acid		Tracing the evolutionary history of novel hormone asprosin: An <i>in silico</i> study across vertebrates	700
Structure-based inhibition of <i>Rhizoctonia solani</i> in rice sheath blight Beta-glucosidase by natural terpenoids	1351	Phytochemical	
		Exploring the potential of <i>Laurus nobilis</i> as activators of insulin receptor activity	431
		Eco-friendly plant based disease control: Exploring <i>Terminalia</i> species extracts as bio-pesticide against fungal pathogen	1410
		Phytoconstituents	
		<i>In silico</i> molecular docking and virtual screening of natural compounds against Tubulin-7-Aminonoscaphine complex (6Y6D) for estimation of anticancer potential	117

Phytohormone		Potential of mean force	
Exploring the role of plant associating bacteria as bioinoculants and their beneficial effects in phytostimulation: A review	567	Understanding the conformational dynamics of an intrinsically disordered protein bound to a small molecule	712
Phytomedicine		Preclinical validation	
Ajmaline-acetylcholinesterase interaction: Insights from Docking, Molecular dynamics, and Predictive machine learning models	990	Computational insights into Curcumin's modulation of Epithelial-mesenchymal transition in pulmonary fibrosis	1111
PIGF (Placental growth factor)		Prediabetes	
Insight into the etiology of preeclampsia	449	Circulating myokines and apelin-13 levels as predictive biomarkers for newly diagnosed type 2 diabetes mellitus	798
Plaksha		Prostate cancer	
Evaluation of osteogenic activity of Plaksha (<i>Ficus lacor</i> Buch. Ham.) stem bark on human dental pulp derived mesenchymal stem cells	131	The influence of quantitative alterations of steroid hormones on energy metabolism of prostate tumors	349
Plant health		Protease activity	
Exploring the role of plant associating bacteria as bioinoculants and their beneficial effects in phytostimulation: A review	567	Inhibition of Botulinum neurotoxin A protease activity by Quercetagenin	161
Plaque psoriasis		Protein A/G	
Marine natural products as novel therapeutic approaches in Psoriasis: A comprehensive review	1056	Development of a sensitive and affordable alternative ELISA method for detection of human IgG antibodies	1007
Pneumococci		Protein interaction	
Antimicrobial and antibiofilm potential of <i>Morus macroura</i> against <i>Streptococcus pneumoniae</i>	665	Predictive analysis of structural interaction among HIV-1 proteins and Class I MHC molecule: A computational approach for therapeutic target	1198
Polo like kinase1 (PLK1)		Protein kinase	
Exploring benzothiazole derivatives: Promising PLK1 Inhibitors for cancer therapy through Virtual screening, Molecular docking, and ADMET evaluation	584	CDK members and ribosomal proteins, a crucial role players in serous capillary ovarian cancer: Insights from gene expression and protein interaction networks	490
Polycystic ovary syndrome (PCOS)		Protein misfolding	
Biochemical predictor for polycystic ovary syndrome	1032	An overview of response pathways for protection of mitochondria from protein misfolding stress	287
Polyhouse		Protein structure	
Detection of root-knot nematode disease in cucumber under protected cultivation in Kumaon region	1299	Neural network based prediction of site-specific stable mutants in wild type CFTR protein	511
Polymorphism		Protein-protein interaction	
SSR marker-based genetic diversity assessment of turmeric (<i>Curcuma</i> spp.) germplasm lines for molecular characterization	1396	Computational insights into Curcumin's modulation of Epithelial-mesenchymal transition in pulmonary fibrosis	1111
Polysaccharide iron complex		Proteostasis	
Structural elucidation and evaluation of antioxidant and <i>In vitro</i> anti-hemolytic properties of polysaccharide-iron complexes from <i>Piper betel</i> and <i>Triticum aestivum</i>	88	An overview of response pathways for protection of mitochondria from protein misfolding stress	287
Polyvinyl chloride		Proteotoxicity	
Green synthesized copper oxide nanoparticles from <i>Ocimum tenuiflorum</i> fabricated in PVC for antibacterial, antioxidant, and anticancer biomedical applications	1092	An overview of response pathways for protection of mitochondria from protein misfolding stress	287
Porous medium		<i>Prunus domestica</i> L.	
Exploring MHD convective based SWCNT-MWCNT-GO ternary hybrid nanofluids with variable viscosity and exothermic reactions	766	Study of antibacterial and photocatalytic potential of phytomedically synthesized ZnO nanoparticles from <i>Prunus domestica</i> L.	1417
		Pulmosphere	
		From 2D to 3D: decoding tuberculosis pathobiology and drug development with <i>ex vivo</i> disease models	253

QSPR analysis		Rice sheath blight	
Quantum chemical analysis and anticancer evaluation of 1,4-benzenedicarboxylic acid bis(2-Ethylhexyl) ester: Topological indices, reduced density gradient, molecular electrostatic potential, natural bond orbital	1325	Structure-based inhibition of <i>Rhizoctonia solani</i> in rice sheath blight Beta-glucosidase by natural terpenoids	1351
Quantitative structure-activity relationship		<i>Ricinus communis</i>	
Aryloxyacetic acid derivatives as inhibitors of the HPPD enzyme: A quantitative structure-activity relationship analysis	882	Identification of novel compound against STAT3 mediated liver fibrosis: An MD simulation based study	178
Quantum size		Investigating the role of phytochemicals from <i>Euphorbia pulcherrima</i> and <i>Ricinus communis</i> in modulating estradiol 17-beta -dehydrogenase 1 activity for breast cancer treatment	733
Size-driven fluorescent properties in Nanophotonics	1290	Roflumilast	
Quercetagenin		Phosphodiesterase 4 as a candidate therapeutic target of cancer	213
Inhibition of Botulinum neurotoxin A protease activity by Quercetagenin	161	Rolipram	
Quercetin		Phosphodiesterase 4 as a candidate therapeutic target of cancer	213
Adhesion G-protein-coupled receptor (GPCR) and Triple-negative breast cancer (TNBC): A new perspective for the therapeutic effect of GPR116 in TNBC	60	Salicylic acid (SA)	
Rate-limiting enzyme		Comprehensive <i>in silico</i> analysis of upstream sequences of <i>TaNRT2</i> gene family of bread wheat: Unveiling effects of hormonal cross-talk on differential homeolog expressions of <i>TaNRT2.1-6</i> under low nitrogen conditions	1187
Assessing the HMG-CoA reductase inhibitory potential of five fatty acids	969	<i>Salmonella</i>	
RBC		Quantitative estimation of Pyrophosphate ions released during loop-mediated isothermal amplification	1101
Structural analysis of Glucose-6-Phosphate Dehydrogenase (G6PD) variants from Northeast India and natural antioxidants as a pharmacological agent to alleviate G6PD deficiency associated challenges- An <i>in silico</i> approach	25	<i>Sargassum</i>	
Reactive oxygen species		Green biosynthesis, characterization, and anticancer activity of <i>Sargassum cinctum</i> zinc nanoparticles	187
Lipid peroxidation level and histological changes in rat liver after the cisplatin and dexamethasone separate and combined action	480	SARS-CoV-2	
Regulatory role of SLC3A2 in Ferroptosis and its impact on head and neck squamous cell carcinoma: A bioinformatics study	1069	Comparative binding efficacy of Ivermectin and Remdesivir against the spike protein of Omicron variants: An <i>in silico</i> perspective	1369
Recurrence biomarker		Scanning electron microscopy	
Environmental and lifestyle factors in epigenetic regulation of bladder cancer: Impact on CALCA and CCNA1 gene methylation	1389	Fabrication of an efficient hydroquinone biosensor with laccase immobilized on multiwalled carbon nanotubes	46
Respiratory health		Screen printed electrode	
Impact of lead acetate oral administration on wistar rat lung health: Histological evaluation	469	Fabrication of an efficient hydroquinone biosensor with laccase immobilized on multiwalled carbon nanotubes	46
Rhizosphere		<i>SDS</i>	
Exploring the role of plant associating bacteria as bioinoculants and their beneficial effects in phytostimulation: A review	567	Identification and <i>in silico</i> impact assessment of missense mutations in key genes associated with hypoxic stress in Changthangi goats	854
Ribosomal proteins		Self-assembly	
CDK members and ribosomal proteins, a crucial role players in serous capillary ovarian cancer: Insights from gene expression and protein interaction networks	490	Self-assembly of novel ureido dipeptide esters and investigation of its gelation property	909
Rice		SEM	
Genomic and structural studies on S-Glutathione transferases to confer herbicide tolerance in rice through computational approach	533	Green biosynthesis, characterization, and anticancer activity of <i>Sargassum cinctum</i> zinc nanoparticles	187

Sequencing		SRSF1 receptor	
Detection of root-knot nematode disease in cucumber under protected cultivation in Kumaon region	1299	Pharmacoinformatic based screening of phytochemicals from <i>Ashwagandha (Withania somnifera)</i> against serine/arginine splicing factor 1 protein in treatment of pancreatic cancer	632
Shear thinning		SSR markers	
Self-assembly of novel ureido dipeptide esters and investigation of its gelation property	909	SSR marker-based genetic diversity assessment of turmeric (<i>Curcuma</i> spp.) germplasm lines for molecular characterization	1396
Shh		<i>Starkeya novella</i>	
Advances in myogenic differentiation: Role of stem cells, RNA-binding proteins, Molecular pathways, and Detection techniques	301	Differences in d-amino acid metabolism mediated by d-amino acid dehydrogenase in autotrophic and heterotrophic cultures of the Sulfur-Oxidizing Bacterium <i>Starkeya novella</i>	955
Signal transduction and extracellular matrix		Stearamide	
Identification of potential therapeutic targets of fatty acids for inflammatory bowel diseases: An <i>in silico</i> approach	754	The HMG-CoA reductase inhibitory potential of fatty acid amides	17
SNPs		Stem-loop structures	
Identification and <i>in silico</i> impact assessment of missense mutations in key genes associated with hypoxic stress in Changthangi goats	854	<i>In silico</i> based profiling and characterization of functional microRNAs and their crucial targets in <i>Saccharum officinarum</i>	154
Sodium salicylate		Stemness	
Phenotypic antibiotic resistance: Involvement of genes and additional factors	281	Potential effects of hesperidin isolated from <i>Zanthoxylum rhetsa</i> against NTERA-2 cancer stem cells	502
Solar wafer		Steroid hormones	
The efficiency development of TiO ₂ and Henna dye-coated solar wafers by Pulsed Nd: YAG laser treatment	1382	The influence of quantitative alterations of steroid hormones on energy metabolism of prostate tumors	349
Solute carrier family 3 member 2		STMS	
Regulatory role of SLC3A2 in Ferroptosis and its impact on head and neck squamous cell carcinoma: A bioinformatics study	1069	Morpho-molecular screening of chickpea (<i>Cicer arietinum</i> L.) genotypes for resistance to <i>Botrytis</i> grey mould disease	381
Soret effect		Stoke shift	
Exploring MHD convective based SWCNT-MWCNT-GO ternary hybrid nanofluids with variable viscosity and exothermic reactions	766	Size-driven fluorescent properties in Nanophotonics	1290
Spectral analysis		Subcutaneous seeding	
Synthesis, characterization and anticancer activity of novel schiff base ligand and its metal complexes	929	Umbilical endometriosis post-laparoscopic surgery: A case of subcutaneous seeding and neoumbilicus creation	1030
Spectroscopic studies		Submandibular salivary gland	
Exploration of DNA binding mode of Coumarin Glycoside Esculin by Multispectral and Molecular dynamics approaches	998	The effects of lipoic acid on rat submandibular salivary gland in valproic acid induced oxidative stress	576
Spheroid		Sulfonamide	
From 2D to 3D: decoding tuberculosis pathobiology and drug development with <i>ex vivo</i> disease models	253	Exploring the therapeutic potential of Zonisamide derivatives through molecular docking and dynamic studies with GABARAP	786
Spinal cord injury (SCI)		Sustainability	
BMSC-derived exosomes regulate the miR-133b/NLRP3 axis to protect against injury to the spinal cord	654	Structure-based inhibition of <i>Rhizoctonia solani</i> in rice sheath blight Beta-glucosidase by natural terpenoids	1351
Sprague-Dawley (SD) male rats		Swiss ADME	
Evaluation of <i>Tagetes Erecta</i> (Marigold) Extract (MaQxan™ (20:2)) potency in induced learning and memory deficit by modulating neurotransmission and synaptic plasticity	355	Virtual screening and molecular dynamic simulation to identify the potent SOX2-inhibiting drugs	596
		Computational insights into Curcumin's modulation of Epithelial-mesenchymal transition in pulmonary fibrosis	1111

Synaptic plasticity		Topological indices	
Evaluation of <i>Tagetes Erecta</i> (Marigold) Extract (MaQxan™ (20:2)) potency in induced learning and memory deficit by modulating neurotransmission and synaptic plasticity	355	GC-MS, DFT, LOL, ELF, NCI-RDG, kinetic energy, reactivity, stability, topological molecular descriptors evaluation on 2-propanone, 1-hydroxy-, Isopropyl alcohol and Glycerin: For NLO application	615
Targeted therapy		Toxicity prediction	
Chromatin higher order structure and possible therapeutic target	237	Computational insights into Curcumin's modulation of Epithelial-mesenchymal transition in pulmonary fibrosis	1111
TCGA		Toxicology	
Overexpression of <i>DDx49</i> promotes cell proliferation and associated with poor prognosis in liver cancer: <i>In silico</i> analysis	147	Bisphenol B: An inhibitor of mitochondrial electron transport chain protein	426
<i>Terminalia</i> Spp.		Transcription factor	
Eco-friendly plant based disease control: Exploring <i>Terminalia</i> species extracts as bio-pesticide against fungal pathogen	1410	Camptothecin exerts anti-cancer effects through FoxM1 Inhibition	331
Therapeutics		Transcriptome	
CRISPR/Cas systems in therapeutics: Transforming gene editing into medical solutions	813	Identification and <i>in silico</i> impact assessment of missense mutations in key genes associated with hypoxic stress in Changthangi goats	854
Thermal conductivity		Localization of cellulolytic system and <i>de novo</i> transcriptome analysis of whole larval gut of <i>Zophobas morio</i> (Coleoptera: Tenebrionidae) disclosed the existence of glycosyl hydrolase family-9	69
Exploring MHD convective based SWCNT-MWCNT-GO ternary hybrid nanofluids with variable viscosity and exothermic reactions	766	The phytochemicals present in <i>Vitex negundo</i> leaf extract transcriptionally regulates colorectal cancer: An <i>In vitro</i> study using HCT-116 cells	1015
Thermodynamic Properties		Transportation	
GC-MS, DFT, LOL, ELF, NCI-RDG, kinetic energy, reactivity, stability, topological molecular descriptors evaluation on 2-propanone, 1-hydroxy-, Isopropyl alcohol and Glycerin: For NLO application	615	<i>In silico</i> based profiling and characterization of functional microRNAs and their crucial targets in <i>Saccharum officinarum</i>	154
Thermostable mutants		Transporters	
Neural network based prediction of site-specific stable mutants in wild type CFTR protein	511	Transport mediated antibiotic resistance in <i>Mycobacterium tuberculosis</i>	267
Thixotropic		Triple-negative breast cancer (TNBC)	
Self-assembly of novel ureido dipeptide esters and investigation of its gelation property	909	Adhesion G-protein-coupled receptor (GPCR) and Triple-negative breast cancer (TNBC): A new perspective for the therapeutic effect of GPR116 in TNBC	60
Time-kill assay		Tri-spectroscopy	
Insights into anti-tuberculosis activity of partially purified bioactive fraction from <i>Vitex negundo</i> L. petroleum ether extracts against <i>Mycobacterium smegmatis</i> -An <i>in vitro</i> and <i>in silico</i> approach	1077	Heterocyclic organic compounds extracted from <i>Artemisia judaica</i> (L.) induced caspase-dependent mitochondrial pathway in different breast and liver cancer cell lines: <i>In silico</i> and <i>in vitro</i> studies	1233
TiO ₂ thin film		Tuberculosis	
The efficiency development of TiO ₂ and Henna dye-coated solar wafers by Pulsed Nd: YAG laser treatment	1382	From 2D to 3D: decoding tuberculosis pathobiology and drug development with <i>ex vivo</i> disease models	253
TMPRSS2		Mathematical modelling of time series data for tuberculosis notified cases in India using neural networks models: CNN, NNAR, and ANFIS models integrated with wavelets	1118
<i>In silico</i> approach for uncovering inhibitors of SARS-CoV-2 by targeting TMPRSS2 via molecular networking-based strategies	544	Umbilical endometriosis	
Tobacco smoking		Umbilical endometriosis post-laparoscopic surgery: A case of subcutaneous seeding and neoumbilicus creation	1030
Environmental and lifestyle factors in epigenetic regulation of bladder cancer: Impact on CALCA and CCNA1 gene methylation	1389	Umbrella sampling	
Tomato		Understanding the conformational dynamics of an intrinsically disordered protein bound to a small molecule	712
Marker and <i>CKX2</i> gene expression-based selection of high yielding tomato (<i>Lycopersicon esculentum</i> Mill.) germplasms	961	Unstructured proteins	
		Force fields for simulating intrinsically disordered proteins: Assessing conformational sampling and structural dynamics	38

UPR ^{MT}		Wavelength sensitivity	
An overview of response pathways for protection of mitochondria from protein misfolding stress	287	Advanced photonic crystal fiber-based surface plasmon resonance biosensors for transformative RI sensing	54
Uric acid by creatinine ratio		Wavelet denoising	
Biochemical predictor for polycystic ovary syndrome	1032	Mathematical modelling of time series data for tuberculosis notified cases in India using neural networks models: CNN, NNAR, and ANFIS models integrated with wavelets	1118
Urothelial carcinoma		Wheat	
Environmental and lifestyle factors in epigenetic regulation of bladder cancer: Impact on CALCA and CCNA1 gene methylation	1389	Comprehensive <i>in silico</i> analysis of upstream sequences of <i>TaNRT2</i> gene family of bread wheat: Unveiling effects of hormonal cross-talk on differential homeolog expressions of <i>TaNRT2.1-6</i> under low nitrogen conditions	1187
UV-Vis		Wistar albino rats	
Zinc Oxide Nanorods from <i>Prunus domestica</i> L.: Bio-Assisted Synthesis, Characterization, Antioxidant and Cytotoxic Activities	78	Impact of lead acetate oral administration on wistar rat lung health: Histological evaluation	469
Quantum chemical analysis and anticancer evaluation of 1,4-benzenedicarboxylic acid bis(2-Ethylhexyl) ester: Topological indices, reduced density gradient, molecular electrostatic potential, natural bond orbital	1325	<i>Withania somnifera</i>	
Valproic acid		<i>Withania somnifera</i> modulates glucose metabolism by inhibiting SGLT2, α -glucosidase and α -amylase: An <i>in silico</i> and <i>in vitro</i> study	518
The effects of lipoic acid on rat submandibular salivary gland in valproic acid induced oxidative stress	576	Pharmacoinformatic based screening of phytochemicals from <i>Ashwagandha</i> (<i>Withania somnifera</i>) against serine/arginine splicing factor 1 protein in treatment of pancreatic cancer	632
VEGF (Vascular endothelial growth factor)		Wnt	
Insight into the etiology of preeclampsia	449	Advances in myogenic differentiation: Role of stem cells, RNA-binding proteins, Molecular pathways, and Detection techniques	301
Viral evasion		XRD	
Predictive analysis of structural interaction among HIV-1 proteins and Class I MHC molecule: A computational approach for therapeutic target	1198	Zinc Oxide Nanorods from <i>Prunus domestica</i> L.: Bio-Assisted Synthesis, Characterization, Antioxidant and Cytotoxic Activities	78
Viral replication inhibition		Green biosynthesis, characterization, and anticancer activity of <i>Sargassum cinctum</i> zinc nanoparticles	187
Computational screening of FDA-approved and natural compounds against Mpox Dual specificity protein phosphatase (H1)	398	Yield	
Virtual screening		Marker and <i>CKX2</i> gene expression-based selection of high yielding tomato (<i>Lycopersicon esculentum</i> Mill.) germplasms	961
Computational analysis of <i>N2</i> -Aryl-1,2,3-triazoles as potential multi-target inhibitors	1129	Zinc oxide	
Vitamin C		Study of antibacterial and photocatalytic potential of phytomedically synthesized ZnO nanoparticles from <i>Prunus domestica</i> L.	1417
Standardization of germination conditions for nutritional enhancement of underutilized basil seeds	391	<i>Zophobas morio</i>	
<i>Vitex negundo</i> leaf		Localization of cellulolytic system and <i>de novo</i> transcriptome analysis of whole larval gut of <i>Zophobas morio</i> (Coleoptera: Tenebrionidae) disclosed the existence of glycosyl hydrolase family-9	69
Green Synthesis of Nickel Oxide Nanoparticles using <i>Vitex negundo</i> Leaf for Antibacterial and Anti-inflammatory Activities	363	α -glucosidase	
<i>Vitex negundo</i>		<i>Withania somnifera</i> modulates glucose metabolism by inhibiting SGLT2, α -glucosidase and α -amylase: An <i>in silico</i> and <i>in vitro</i> study	518
The phytochemicals present in <i>Vitex negundo</i> leaf extract transcriptionally regulates colorectal cancer: An <i>In vitro</i> study using HCT-116 cells	1015	α -amylase	
Vitexin		Standardization of germination conditions for nutritional enhancement of underutilized basil seeds	391
Exploration of phytochemical compounds from Millets as NRF2 activators using molecular docking and molecular dynamics simulation approaches	372	α -amylase	
Water models		<i>Withania somnifera</i> modulates glucose metabolism by inhibiting SGLT2, α -glucosidase and α -amylase: An <i>in silico</i> and <i>in vitro</i> study	518
Force fields for simulating intrinsically disordered proteins: Assessing conformational sampling and structural dynamics	38		
Waveguide			
Advanced photonic crystal fiber-based surface plasmon resonance biosensors for transformative RI sensing	54
