CSIR-NIScPR Policy on Plagiarism

The system of formal communication in science through publication in primary journals is based on originality and quality of information being the only criteria for publication. However, there have been tendencies to misuse the system and vitiate the process of science communication for personal benefits. One of the ills afflicting science communication is plagiarism. Attempts at plagiarism may range from verbatim, copying of extensive material of other authors, misappropriating results/data of others with minor changes in language/presentation without giving credit to the original source, to publish essentially the same information more than once.

As the premier publisher in India of primary scientific journals in various disciplines of science and technology, NIScPR strongly reiterates its policy of discouraging plagiarism of all kinds. All efforts are made to detect and frustrate attempts at plagiarism through editorial screening and rigorous peer review in respect of communications received for publication in NIScPR publications. Cooperation of the scientific community is sought in our efforts to frustrate all attempts at plagiarism.

In case any attempt to plagiarise is brought to our attention accompanied with convincing evidence, following steps would be taken:

- (a) After consulting the respective Editorial Board Members authors guilty of plagiarism will be debarred from publishing their papers in NIScPR journals.
- (b) Heads of the departments/institutes of the offending authors will be intimated of such incidences.
- (c) Such incidents of plagiarism will be publicised through the concerned NIScPR journals with consultation with the respective Editorial Board Members.

It is mandatory on the part of the author(s) to furnish the following certificate at the time of submission of the manuscript for publication:

[This is to certify that the reported work in the article entitled, "(give full title with all the authors name)" submitted for publication in the journal, the..... is an original one and has not been submitted for publication elsewhere. I/we further certify that proper citation to the previously reported work have been given and no data/table/figures have been quoted verbatim from other publications without giving due acknowledgement and without permission of the author(s). The consent of all the authors of this article has been obtained for submitting the article to the journal, "....."
