Refers to: RETRACTED “Synthesis and Analysis of Biomass based Green Acoustic Shielding Material” J Sci Ind Res, Vol 80(7) (July 2021) 630-637.

This article has been retracted at the request of the Editor.

Reasons: Though the studies differ in certain aspects, there is significant overlap in the content of the above study with the study published in IJPAP [Singh & Nath, Noise reduction analysis through biomaterial based acoustic material, *Indian J Pure Appl Phys*, 59(6) (June 2021) 429-436]. The findings are not substantially incremental enough to be justified as a separate piece of work. Further, there is reuse of many figures without proper citation and publication of a few figures that replaced the original figures.

The matter has been pointed out by a reader and is being thanked for the same. The scientific community takes strong view on this matter and we deeply regret any inconvenience to the scientific readership.
